

Wastewater

Current wastewater service within the corporate city limits is made available to new customers for a connection fee according to user type and location. If wastewater service is not available for new development, the developer is responsible for the extension of a public sewer system, and the City will inspect and maintain it after successful installation.

If you are currently a City of Colquitt Utilities customer and need to add Wastewater services to your account, please contact us at (229) 758-1000
